

For Immediate Release

**Codan Releases ISB Capability for the NGT™ Series of HF Radios
Doubles data rate for e-mail**

London, DSEi (Booth #N4-571). — September 13, 2011. Codan Limited (ASX-CDA) announced the introduction of the Independent Sideband (ISB) capability for the Codan New Generation Transceiver (NGT™) product range.

Paired with Codan's RM50e data modem, the NGT™ supports data applications using MIL-STD-188-110A/B waveforms, yielding data rates of up to 9,600 bps. Codan's ISB option doubles this data capability to up to 19,200 bps, using the MIL-STD-188-110B Appendix F waveform. This results in significantly improved responsiveness and reduced transmission times for data intensive applications such as e-mail.

"Codan's NGT™ has enjoyed immense success in the marketplace," said Steven Jenkins, director, Product Management, Codan Radio Communications Division. "Its revolutionary mobile-phone style handset user interface, combined with a broad array of features including certified MIL-STD-188-141B ALE, CES-128/AES-256 voice encryption, frequency hopping, and industry-leading RF performance, has made it the product of choice for mobile and base station applications. The addition of ISB will offer tremendous data flexibility in addition to our industry-leading set of features."

Codan's ISB capability is available as an option on NGT™ SRx and NGT™ MR (military) Models. Both models can be deployed in base, mobile or portable configurations and users can connect countless devices such as crosspatch, telephone interconnect, or additional modems.

Demonstrations of the Codan high frequency radio communications can be viewed at the Defence Systems & Equipment International (DSEi) trade show in London at booth #N4-571.

About Codan Limited

Codan Limited designs and manufactures a diversified product range for the international [high frequency radio](#), [satellite](#) and [metal detection](#) markets. Founded in 1959, Codan is a globally active company that employs 500 employees worldwide. Codan's products are sold into more than 150 countries with exports representing approximately 90% of revenues. Codan excels in customer service and support throughout the world via a network of dealers, distributors and agents.
