

Patrol 2110M MANPACK MOUNTING ACCESSORIES

➤ FEATURES AT A GLANCE

- Range of mounting accessories for vehicle or base installation
- Easy to use & configure
- Rugged design for use in the field

Codan has developed a complete range of easy to use mounting accessories for the 2110M Manpack Transceiver, designed for quick, simple and convenient vehicle or base installation. Each can be easily configured to suit your requirements.

MOUNTING CRADLE

Heavy duty docking cradle used to secure the 2110M Manpack Transceiver in a vehicle or base.

Supplied with quick release latches and screw kit, the radio with battery pack attached can be quickly secured or removed for on-the-run military operations.

MOUNTING CRADLE WITH INTERFACE ADAPTOR

This mounting kit includes a mounting cradle with an interface adaptor for external antenna, GPS, data interfaces, DC battery charger, and the 9350M Automatic Tuning Whip Antenna.

The kit also includes a speaker amplifier and external speaker, and can be adapted to interface with a VP-116 Voice Privacy Unit via an NGT™ VP-116 Interface cable.

EXTERNAL DC BACKPANEL & VEHICLE KIT

A DC supply backpanel for the mounting cradle that provides DC connection for the Transceiver directly to the vehicle battery.

The vehicle kit comes with the backpanel, cables, screws, fuse and accessories.

This option is recommended for vehicle installations or where mounting space is limited.

An optional voltage regulator is available for operation in 24 / 26 V vehicles.

CODAN™ and NGT™ are trademarks of Codan Limited. Other brand, product and company names mentioned in this document are trademarks or registered trademarks of their respective holders.

Values noted are typical. Equipment descriptions and specifications subject to change without notice or obligation.
