

We believe it's our people that makes us great.

Acceptance Test Engineer

Codan Limited designs and manufactures a range of high value added electronics products for global government, business, aid & humanitarian, public safety and security markets.

We are currently recruiting full-time **Acceptance Test Engineer** to be part of the existing test team based at Mawson Lakes, Adelaide.

Key Responsibility for this position will be planning, developing, supporting and executing Acceptance and System test processes for Codan's communications products.

The role requires experience in full Software Development Life Cycle.

Qualifications & Requirements:

- Tertiary qualifications in Electronic, Computer Systems or Software Engineering or equivalent
- Minimum 2 years' experience in system validation and verification of electronics and software products
- Experience with test methodologies and best practices, developing test plans, creating test cases, analysing defects and participation in technical design reviews
- Demonstrated system testing skills, with preference given to applicant's experienced with radio frequency products
- Fluency in test automation using Python or scripting languages
- Basic knowledge of networking, TCP/IP, UDP, SMTP, monitoring tools
- Proven communication skills, both verbal and written
- Accuracy and attention to detail with the proven ability to estimate work, set priorities and meet tight deadlines
- Strong problem identification and resolution, organizational, time management and prioritizing skills
- Exposure to working in a fast-paced, Agile product development environment
